

Updating your Driver License / ID? You need to update your Voter Registration information, too!

Starting in August 2024, Floridians renewing or updating their driver license or Florida ID card now receive a NEW number on the card. That means the ID number will no longer match the number in the voter registration system.

This does NOT affect in-person voting or your eligibility to vote!

But it DOES impact:

- Vote-by-mail ballot requests (you will get an error message if requesting online)
- Signing ballot initiative petitions (your petition could be rejected)

Here are 4 options to make sure your Supervisor of Elections is notified of your new ID number so that you avoid any problems:

- When renewing or updating your driver license/Florida ID card at the DMV/Tax Collector's office, select YES to update your voter registration.
- Call your [county Supervisor of Elections office](#) to update your ID number and/or request your vote-by-mail ballot.
- Go to RegisterToVoteFlorida.gov, click "Register or Update," and then select "Request to Replace Voter Information Card". When prompted to enter your Florida DL or Florida ID card number, enter the NEW number. Then complete the process of requesting a new card.
- Submit a [paper Voter Registration Form](#). Check the "Update or Change" box, fill the form out, sign, date, and mail it to your county Supervisor of Elections.

Please share this information with your friends, family, and neighbors!
